

*About the Design of the Cover :*

*The cover is designed to envisage a hopeful future shining in the sky which is a clear blue like the color of the JAEA logo. This is accompanied with white colored hexagons similar to the pattern in a tortoise shell which symbolizes the wish of people for longer lives from ancient times in Japan. Coincidentally, this shape is the same as that of the core fuel assemblies for both the prototype “MONJU” Fast Breeder Reactor, and the High Temperature Test Reactor “HTTR”.*

*The picture in the upper left shows 3D image of the computer-based nuclear emergency response system “WSPEEDI-II: Worldwide version of System for Prediction of Environmental Emergency Dose Information 2nd version”.*

*The picture in the lower right shows the facilities of JAEA Horonobe Underground Research Center where we are conducting R&D activities for advanced geological science and geological disposal of high-level radioactive wastes.*
